PROFESSIONAL SUMMARY

Frontend Developer skilled in React.js and Next.js, shipping features end-to-end across healthcare, immigration, and e-commerce platforms. Leads code quality reviews for a team of developers and uses AI tools like Cursor AI and Copilot to speed up delivery.

TECHNICAL SKILLS

- **Core:** React.js · Next.js · TypeScript · JavaScript (ES6+) · HTML5 · CSS3
- **State & Data:** Redux · REST API
- **Libraries:** react-hook-form · Yup · shadcn/ui · GSAP · Socket.io-client · Day.js · react-pdf · react-qr-code · react-signature-canvas
- **Performance & Tooling:** Code-splitting · Image optimization · Git · GitHub · VS Code · Vercel · Netlify · CI/CD (TravisCI)
- **Platforms:** WordPress · WooCommerce
- **AI-Assisted Development:** GitHub Copilot (GenAI) · Cursor AI · Prompt Engineering
- **Backend Awareness:** Node.js · REST API controllers and server-side logic flow

PROFESSIONAL EXPERIENCE

Frontend Developer — Diligent Infotech

Jul 2024 – Present

Hoshiarpur, Punjab

- Built and shipped features in React.js and Next.js across healthcare, immigration, and e-commerce platforms.
- Improved page load speed through code-splitting and image optimization in Next.js.
- Led code reviews for a team of junior developers as the frontend quality gate.
- Drove faster delivery using AI tools like Cursor AI and GitHub Copilot; recognized as Employee of the Month multiple times.

Frontend Developer Intern — Diligent Infotech

Jan 2024 – Jul 2024

Hoshiarpur, Punjab

- Built responsive UI components in React.js and CSS for live client projects.
- Fixed UI bugs and layout issues to improve consistency across devices.
- Learnt Git and Agile workflows while working alongside senior developers.

KEY PROJECTS

- **Immigration Docs Platform** (Next.js, React.js, CSS, REST API) — Document-sharing portal that lets immigration agents and clients upload, track, and review case documents in one place, replacing scattered email attachments with a single organized workflow. Built the interface fully responsive so agents can review submissions and monitor case status from any device.
- **Healthcare Booking Platform** (React.js, Next.js, CSS, REST API) — Online appointment system for eye clinics with a mobile-first booking flow, letting patients of all ages book visits directly without calling the clinic. Focused the UX on minimal steps and clear slot visibility to reduce booking drop-off for less tech-comfortable patients.
- **Email Marketing Template Builder** (Next.js, CSS, TravisCI) — Email templates engineered to render consistently across clients like Outlook, Gmail, and Apple Mail, which often interpret HTML/CSS differently. Set up TravisCI to automate deployment, removing manual release steps and making updates faster and more reliable to ship.
- **Moy-Moy Product Website** (Next.js, CSS, Branding) — Product showcase site with clean visual design and clear product presentation, built to give potential customers an easy way to explore the brand and adapt smoothly across devices.
- **Biology Education Platform** (Next.js, CSS, REST API) — Online learning platform for biology students and teachers with clean, intuitive navigation, designed so users can move between topics and resources without confusion during regular use.
- **Interactive Gaming Website** (HTML5 Canvas, CSS, JavaScript, Bootstrap) — Browser-based game with real-time gameplay and smooth animation, built using Canvas rendering and JavaScript-driven game logic, with a responsive Bootstrap layout to keep it playable across screen sizes.

EDUCATION

B.Tech, Computer Science & Engineering 2020 – 2024

Rayat Bahra Institute of Engineering and Nano Technology, Hoshiarpur, Punjab

ACHIEVEMENTS

- 3× Employee of the Month, Diligent Infotech
- Winner, GNS University Web Development Competition
